BUYERS' GUIDE

Buyers' Guide to Building Products and Services

PRODUCT	DETAILS
	<p>Kimberly-Clark Professional* Introduces Automatic Door Handle Disinfectant</p> <p>Kimberly-Clark Professional's new Automatic Door Handle Disinfectant is designed to stop the spread of germs on door handles through an innovative approach to surface hygiene. The disinfectant safely and effectively kills 99.9 percent of germs and viruses on the entire door handle, including the underside, by using a quick-drying, EPA-registered, hospital-grade, alcohol-based disinfectant mist. The unit is compatible with existing door hardware, easy to install, programmable and cost effective, with refill canisters lasting up to 100 days and ambient light sensors helping extend the life of the battery.</p> <p>For more information, visit www.kcprofessional.com</p>
	<p>New Floor Finish Provides Low-Maintenance Gloss</p> <p>Spartan Chemical Company, Inc. has developed FloorFront, a high-gloss, low-maintenance floor finish made especially for high-traffic areas. FloorFront needs half the burnishing, recoating and stripping necessary of other zinc-free finishes and, with a Green Seal GS-40 certification, the finish also has an environmental advantage. Its modern polymer technology formula provides for exceptional clarity, gloss and durability without any concern for yellowing. The finish will not powder with repeated burnishing and is detergent resistant.</p> <p>For more information, visit www.spartanchemical.com</p>
	<p>Overhead Rain Guard Protects Doors and Windows from the Elements</p> <p>Made of durable and recyclable ABS plastic, the Doorbrim is a long-lasting exterior overhead rain guard that diverts water away from doorways and windows, protecting and extending the life of doors, frames and hardware. The Doorbrim can be easily installed over new or existing doors or windows and is adaptable to many building surfaces, including aluminum, vinyl, steel, wood, brick, stucco and concrete. Each Doorbrim reduces the possibility of mold growth and prevents costly repairs or premature replacement of exterior doors and windows.</p> <p>For more information, visit www.doorbrim.com</p>
